SUMMARY

I am a Software Engineer who started and ran my own business for 12 years. I'm an exceptional communicator and project manager, with a natural ability to help a team execute goals. I also have a background in Sales, and helped build a startup company in Life Sciences.

SKILLS

- **Frontend** - JavaScript, React, HTML, CSS
- **Backend** - Node, Express, Mongoose, MongoDB

SOFTWARE DEVELOPMENT PROJECTS

Custom T-Shirt App | Frontend, Backend, Live App
- Custom clothing app that gives the user the ability to manipulate images, text and colors over a T-shirt.
- Used Mongoose, Express, React and Material UI components as the CSS framework.

Easy Philanthropy | GitHub, Live App
- Built an App that allows the user an intranet perspective of a full CRUD Non-profit search App.
- Used HTML, CSS, JAVASCRIPT, EXPRESS and MONGO DB.

Safe Exchange | Frontend, Backend, Live App
- Worked with a Team of 3 on an App that allows parents in Family court Mediation to become Authorized Users, and safely exchange their children in a GPS video log.
- Used Git merging branching to communicate with one another.
- Our tools were Express, React and Firebase.
